TIDINESS

1. Would you say you are a tidy person?

Undoubtedly, I'm a neat person as I like my things to be well-kept and in cleanness. In fact, whenever I find the things scattered, I get restless and even it really drives me crazy. I put them in order immediately. I try my best to keep my surrounding spic and span ranging from folding my clothes, making my bed to cleaning my dishes on a regular basis.

2. Is your home very tidy?

I would say "yes". As you know, a messy house is said to represent a disordered mental state. For this reason, I group items in my house in categories and put them in specific places. By keeping everything in good order, I don't have to search frantically for a key, a watch, a shirt or a pair of shoes every morning. What's more, I vacuum my home every day. Therefore, my house looks neat and tidy. More importantly, regularly-cleaned places are vital to a healthy life as they are free of harmful bacteria and viruses.

3. Are you a tidy person at work, school or at home?

I believe I'm neat at both home and out because keeping my belongings organized and surroundings spic and span is my habit and it does not change with change of place. It's mainly because I don't want people form a bad impression about me. I always try to become well-organized no matter where I am.

4. How do you keep things tidy?

Well, I keep things in order by putting them at their exact place after using them. I always make sure to arrange my books in my bookshelves where they look pleasant to my eyes, fold and hang my clothes in an organized way so it's easier for me to find a perfect outfit whenever I need to attend a special event. Actually, that's very convenient and being organized saves me from wasting my time.

5. Do you think it is possible for people to be tidy all the time?

No one's perfect. I'm guessing it's easier said than done but I fervently believe that people cannot be neat regularly. Honestly, there are times that I miss arranging things in my house because I'm occupied by so many

tasks and that's just normal. However, I suppose although it's a personal choice, being tidy is good for your health since it helps to create a clean surrounding for you.
